

European Medical Information Framework
Vision ♦ Mission ♦ Values

Vision

To be the trusted European hub for health care data intelligence
enabling new insights into diseases and treatments

Mission

The EMIF project aims to improve access to human health data for life sciences research - this will be achieved via a 3 phased approach:

Knowing

Realize cohort integration and data source profiling to allow meta data browsing

Accessing

Allow searches on aggregated data across different sources and countries within a single point of access

Using

Allow advanced data analysis for specific research questions into the identification and validation of novel biomarkers

Values

- Improve public health by enabling new scientific insights into diseases and treatments
- Provide sustainable, state of the art solutions through professional and open collaboration
- Serve as an independent, trusted and transparent research partner for access to and analysis of health care data
- Comply with all relevant ethical, legal, regulatory and privacy protection standards and policies

The research performed in this project receives support from the Innovative Medicines Initiative Joint Undertaking under EMIF grant agreement n° 115372, resources of which are composed of financial contribution from the European Union's Seventh Framework Programme (FP7/2007-2013) and EFPIA companies in kind contribution.
